DOCTOR APPOINTMENT BOOKING FOR PATIENTS

ABSTRACT:

The Hospital Appointment Booking Website allows patients to view doctors and easily book medical appointments online. The system collects patient details and schedules appointments based on doctor availability. It is developed using HTML, CSS, and JavaScript to provide a simple, interactive, and user-friendly interface for efficient healthcare access.

CO-WISE IMPLEMENTATION:

CO - 1

Linear Search Algorithm, Input Validation Algorithms, Date & Time Validation Logic, Conditional Statements for Algorithmic Decision Making

CO - 5

Real-World Application of Linear Data Structures, Data Structure based Appointment Management System

CO - 3

Queue Data Structure, FIFO Processing, Queue Insertion and Traversal using LinkedList

CO 2

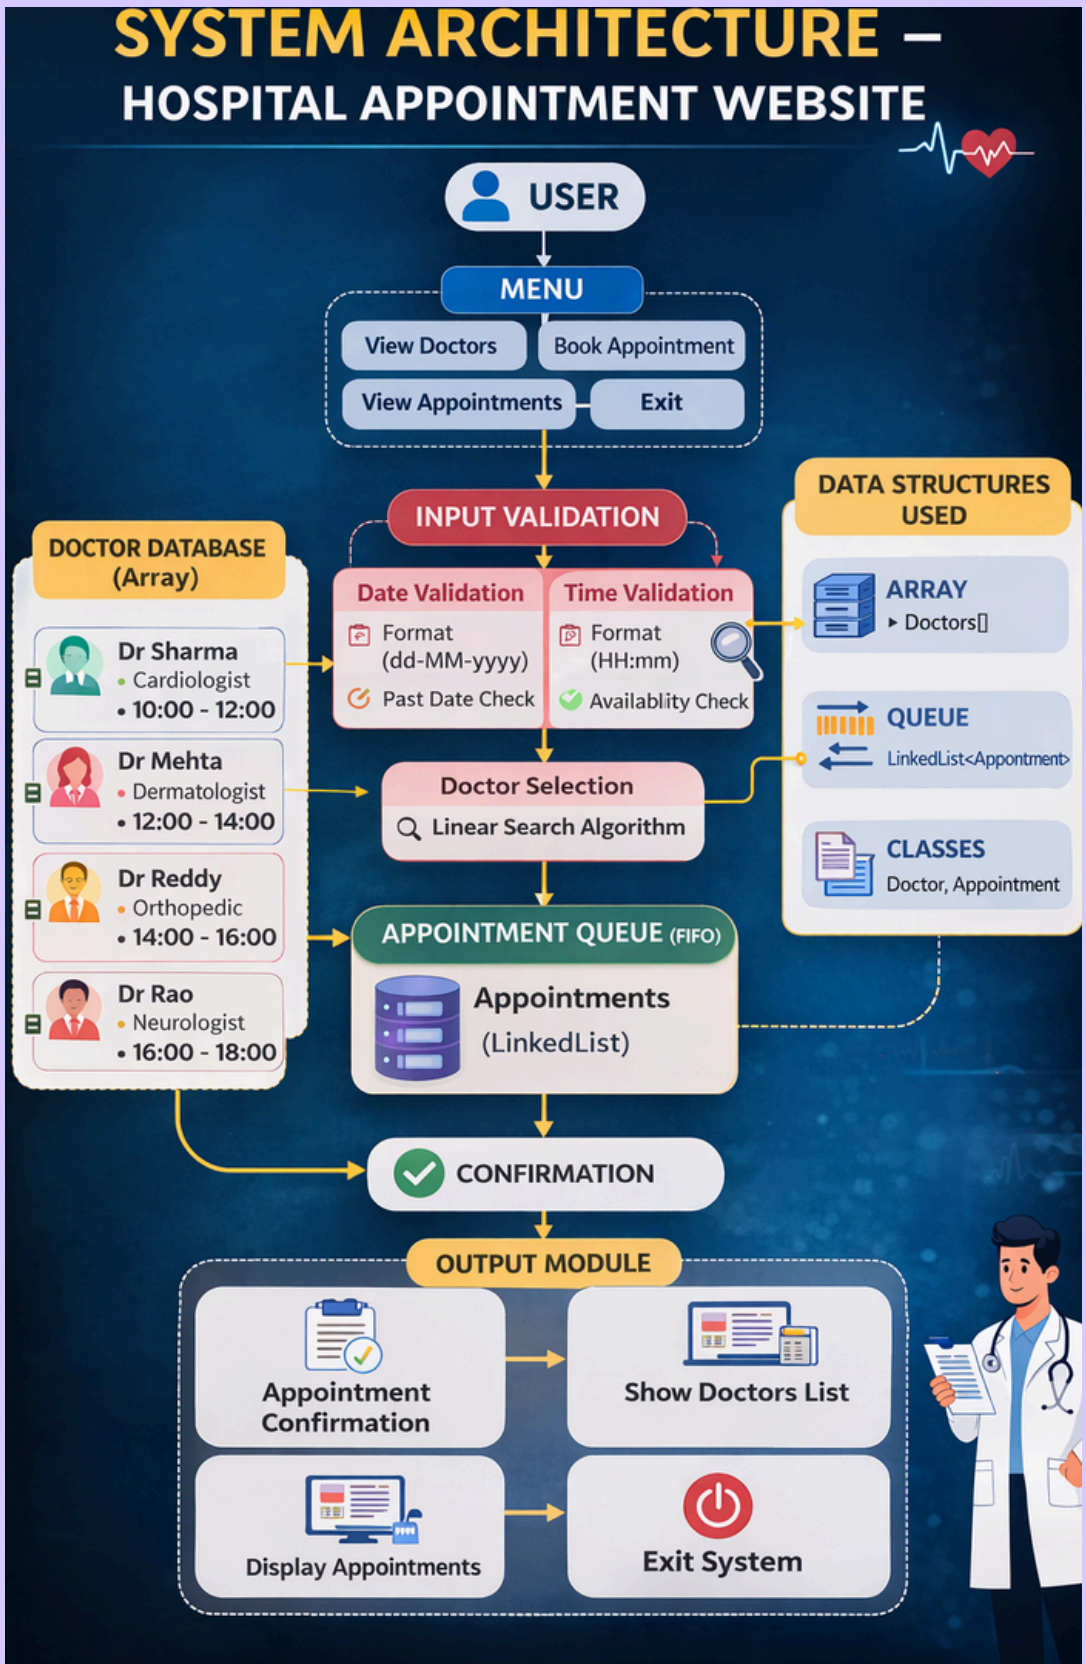
Abstract Data Type using Objects, Arrays for Data Storage, Object-Oriented Data Modeling

CO - 4

Java Collections Framework (Queue Interface, LinkedList Implementation);

CO - 6

Java Application Development, Integration of Multiple Data Structures, Menu Driven Program Implementation



CONCLUSION & FUTURE SCOPE

The hospital appointment booking website helps patients easily view doctors and book appointments, and it can be enhanced with features like patient login and doctor availability tracking.
